

## streamline workflows to scale exponentially as project demands increase

### expand your projects, and your opportunities with XERA

Managing large data intelligence projects requires powerful software that can expand, flex and maintain data integrity as needs evolve. iCONNECT's XERA Review Platform enables you to scale exponentially as project demands increase to handle big data in SQL<sup>®</sup>, Oracle<sup>®</sup> and in the Cloud anywhere in the world. XERA enables you to manage large-scale, critical intelligence projects effectively across multiple departments, locations and systems.

- Manage upwards of 12 billion records, 6,000 cases and 700 concurrent users
- Easily adapt, scale and expand to changing case-loads in excess of 12TB
- Minimize worry with highly-expansive processing power
- Operate XERA in SQL<sup>®</sup> or Oracle<sup>®</sup> databases
- Quickly customize workflows to streamline review project efficiencies and accuracy
- Integrate applications seamlessly with well-designed APIs
- Scale projects via Firefox<sup>®</sup>, Chrome<sup>®</sup> and Safari<sup>®</sup> browsers

### engage with XERA

### about iCONNECT | XERA

Built in HTML5, XERA is an intuitive, multi-browser, hosted eDiscovery review platform developed by iCONNECT to optimize the review, analysis and production of electronically stored information (ESI). Operating on a SQL<sup>®</sup> or Oracle<sup>®</sup> database, XERA empowers document teams to maximize productivity through it's easy to navigate interface, enhanced social collaboration and remote accessibility features.

iCONNECT Development, LLC is a global market leader in developing innovative document review software, services and programs that empower people to complete complex legal review projects more cost effectively. As early innovators of eDiscovery review software since 1999, and with the recent release of its revolutionary web-based, XERA eDiscovery Review Platform, iCONNECT continues to raise the bar for advancements in developing intelligent, easy to use tools that help hosting providers, law firms, corporations and government agencies worldwide optimize workflows and manage big data more efficiently.
