

# Find it. Graph it. Share it.

Visualize. Understand. Optimize.

*iVIEW Data Visualizer maximizes the value of your data: discover key facts about your data and review coding metrics to quickly measure project status.*

*iVIEW Data Visualizer's visually rich data display drives various workflows such as early case assessment, investigative review, predictive review, and many others.*

*Driven by iCONNECT's customized visualization engine, our unique graphing tools showcase your data and streamline your review workflow.*

## Visualize

- Easily assess and monitor project status with visual project review metrics.
- Intelligently display data with flexible chart types and data options.
- Quickly uncover key concepts with clusters, and interactively review them in a Mosaic Graph.
- Customize your dashboard with tiles that display what you need to know, and fine tune it as investigative review needs change.

## Understand

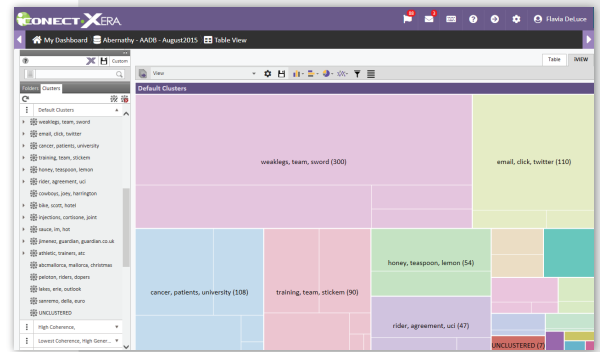

- Fully explore and analyze your document collection and zero in on significant data with interactive chart options.
- Quickly identify all custodians and relevant communication.
- Obtain real-time review status to meet your project goals.
- Communicate insights, project status and more using a chart style that will showcase your data.

## Optimize

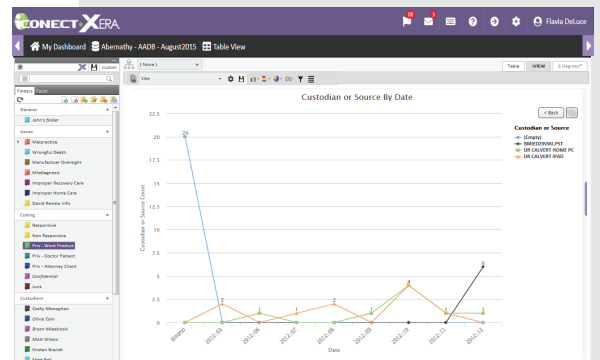

- Instantly cull the document collection with just a click.
- Easily build upon and refine chart data, interactively filtering the graph with facets and custom searches.
- Share real-time statistics and results with project members or clients.
- Effortlessly display metrics with intuitive date options that flex to meet your review schedules.

Create dashboard tiles to view information at a glance.

Graph cluster and document data, coding and user activities.

Customize view and create templates or capture the image and print or share with others.
